It Pays to Protect.

What is it?

The Vantage Pontoon Guard™ is a HEAVY DUTY Extruded PVC material that will produce long lasting protection from inevitable dock/bumper rash, trailer guides, and boat lift rails that make your pontoon tubes look old and damaged. The Vantage Pontoon Guard is UV protected for durability and long life. We use only high quality 3M Pressure Sensitive Adhesive, for long lasting adhesion. Whether your pontoon is new or used, the Vantage Pontoon Guard™ will protect your investment for years to come.

Why Your Boat Needs It?

1. The outer edge of any pontoon, by design, is vulnerable to damage. The Vantage Pontoon Guard™ will protect your tubes from the most common damage.
2. The Vantage Pontoon Guard™ will keep your pontoons looking new.
3. If your tubes are already damaged, the Vantage Pontoon Guard™ will cover up existing scratches and protect them from future damage.
4. The Vantage Pontoon Guard™ provides a unique, custom look.
